NYSM250-6791

Dear Mrs. Smith,

I just got notification that your results are available and it does appear that you have caught strep (probably from your son the "two legged incubator"). Rather than put you on what I gave him, I would suggest that we put you on some amoxicillin, which should start to clear stuff up in the next few days.

I think you should try to come in some time next week, I've held a couple of times open for you if you can confirm to me in the next day, otherwise, please call my office for an appointment.

Please let me know if I can be of further help.

Best regards to george.
